CMHC Digital-Hybrid Program

The CMHC Digital-Hybrid program utilizes a combination of Digital Synchronous, Digital Asynchronous, and In-Person synchronous learning. The program course syllabi identify the course activities and assignments along with dates/times and the designated learning platform (Canvas-asynchronous and Zoom or in-person synchronous class meetings). In addition, all email system.
Wilmington University provides all students a University-issued account for these communications. Some key concepts, definitions, and program requirements are provided below:

> **Digital Asynchronous Learning -xCanvas**: Wilmington University and the CMHC Digital-Hybrid Program utilize Canvas as a Learning Management System. All CMHC program courses have a designated Canvas course. The Canvas courses contain your

MyWilmu and Canvas Email

Wilmington University provides students with a MyWilmu account that gives access to the learning platform (Canvas). All university and program correspondence is done through this address. The Canvas course is linked to this email and you can use the email in each Canvas course to send messages to classmates and professors. **You should check your Wilmington University email every day and respond to messages in a timely manner**.
See guidelines on your MyWilmu student email account:
