FACULTY MEMBER: **TERM:**

COURSE TITLE: Advanced Web Applications Development

COURSE NUMBER: DSN 230

OFFICE HOURS/METHOD OF CONTACT: instructor e-mail

COURSE DESCRIPTION:
Throughout this course we will take an in-depth look at creating media design in Adobe Creative Suite, specifically Illustrator 6. Students will learn to manipulate existing art as well as creating new art. You will learn the use of style sheets, pattern maker and other aspects of the application to make your projects. Students will be expected to produce all projects in Illustrator 6 and upload the files to Canvas in the correct assignment area. **Required Software: Adobe® Creative Suite® Illustrator CS6.**

COURSE OBJECTIVES:

GOAL #1: Understand how to design and produce projects in Adobe Illustrator CS

Learning Outcomes - The student will
  A. View graphics and analyze how they were created.
  B. Manipulate existing art drawn in Adobe Illustrator.
  C. Experiment with all tools available in application.
  D. Understand and demonstrate the use of the tools in application.
  E. Understand and demonstrate the use of layers and symbols in application.
  F. Understand and demonstrate the use of multiple art boards in application.

GOAL #2: Understand commercial printing and its impact on digital files.
