

- B-1 Analyze the legal and regulatory liability associated with business environmental practices.
- B-2 Evaluate businesses sustainability disclosure requirements associated with shareholder and debt rating decisions, business risks, and financial impacts.
- B-3 Explain how legal and regulatory activities impact the cost, benefit, and risk to businesses in domestic and international markets.

GOAL C:

Students will demonstrate understanding of political, social, and environmental risks driving businesses to implement sustainable strategies and plans

Learning Objectives: The student will:

- C-1 Examine regulatory, legal and macroeconomic environments and how each impacts the efficacy of sustainable business cultures.
- C-2 Assess the cost of political and social risk associated with sustainability plans.

GOAL D:

Students will demonstrate understanding of procurement management, operations management, and supply chain management principles and how each applies to effective business sustainability
